

Operational Safety and Security Report

All Staff can use this form to report an air safety incident, safety hazard, Security incident or other operational issues affecting TVJ

*Do you require your report to remain confidential?		Reply required from SSQA department
☐ Yes	Note: Anonymous reports will not be accepted. Your identity will kept confidential by the SSQA department only if request.	
		☒ Yes

What type of report?	☐ ASIR Note – only Pilots must complete page 2	☒ Hazard	☒ Safety	☐ Security	☐ Other
----------------------	--	--	--	-----------------------------------	--------------------------------

General Details <i>Complete as much detail as possible in this section</i>					
Date and time of incident DD / MM / YYYY 21/04/2022	HH / MM 04:00	☒ UTC ☐ Local	☐ A320 ☒ A321	Registration HS-VKM	Flight Number VZ100
Departure BKK	Arrival CNX	Diverted to	Location of incident	Specific Location	

Effect of incident on flight Risk of Spreading Contagious Disease Inflight

Detailed Description-Describe what happened? What alerted you to the situation? Factors issues involved?

AFTER FINISHING MY SIMULATOR PPC CHECK, I CHECKED MY AIRCRAFT FOR VZ100 TOMORROW AND FOUND THAT IT WILL BE HS-VKM. I CHECKED AIRCRAFT STATUS GOR HS-VKM AND FOUND THAT ITS APU IS STILL INOPERATIVE.

THIS APU INOPERATIVE PROBLEM WAS RECORDED INTO LOGBOOK SINCE 31JAN2021 AND PROLONGED. SINCE MY FIRST OSSR WITH THIS PROBLEM ON 04JAN2022, I GOT REPLIED FROM MR. PONGSATHORN TEEKENG(SSQA SAFETY OFFICER) THAT IT IS CAT D AND VALID UNTIL 30 APRIL 2022.

TODAY I JUST FOUND OUT THAT THIS APU INOP WAS RIE UNTIL 08 JUL 2022, WHICH IS CONSIDERED UNACCEPTABLE DURING THIS OMICRON PANDEMIC PERIOD.

ACCORDING TO IATA AND CAAT RECOMMENDATION, THE MAIN FUNCTIONS WHICH CAN DECREASE COVID-19 INFECTION WITHIN AIRCRAFT ARE VENTILATION AND FILTRATION FROM AIRCRAFT PACKS ONLY, WHICH CAN NOT BE REPLACE WITH PCA(NO HEPA FILTRATION IN ANY PCA IN THAILAND).

CAAT EVEN PUBLISHED THEIR PUBLICATION THAT "AIRLINES MUST RESOLVE ANY MEL PROBLEM WHICH CONCERN WITH VENTILATION AS SOON AS POSSIBLE". THIS RIE FOR APU INOP IS INTENTIONALLY NEGLECT TO CAAT RECOMMENDATION FOR COVID-19.

SINCE AIRCRAFT PACKS ARE THE ONLY SOURCE OF HEPA-FILTRATED AIR FOR PASSENGER, AND MY CREWS. RIE OF APU REPLACEMENT WILL BE CONSIDERED AS INTENTIONALLY INTRODUCE A HIGHLY CONTAGIOUS ENVIRONMENT TO THEM AND MIGHT BE SUED BY OUR PASSENGERS,

AS A PIC OF THIS FLIGHT, ACCORDING TO SMS POLICY, WHICH LET PIC MITIGATE THIS RISK, I CONSIDERED ANY APU INOP AIRCRAFT AS AN INTOLERABLE HAZARD TO MY CREWS AND MY PASSENGERS. I CAN NOT FIND ANY MITIGATION PROCESS, EXCEPT THAT SWITCHING THIS AIRCRAFT TO USE WITH CARGO FLIGHT ONLY, NOT WITH PASSENGER FLIGHT, UNTIL YOU CAN SOLVE THIS APU INOP PROBLEM.

Action Taken to Manage The situation and recommended Safety Actions

Inform SSQA by this OSSR.

Instructions

1. All staff complete page 1 (as much detail as possible). For VR, Flight crew completes both pages 1 and 2.
2. Personally fax pages, email, hand deliver within 24 hrs to SSQA department.

* Confidential reports must only be sent to SSQA directly by email or in person

Phone No. +66-2111-5999 #3101, Fax No. +66-2-1343541, Email: vz.safety@vietjetair.com

*For confidential Email: vz.confidential@vietjetair.com
