			Staff No:	TVJ	Block time	
Instructor's Name:	☐ FI-S	☐ SFI	FIC / IC No:		FSTD No.	
			Staff No:	TVJ	ACFT Type	☐ A320 / ☐ B737
TYPE OF TRAINING	☒ LOFT	☒ SPOT / SKILL BASED	Route	VVDN-WVCR	LOFT Duty	☐ PF / ☐ PM

Remark: N/O = Not Observe, N/A = Not Applicable, Mark ✓ for grading and where applicable, (*) = Mandatory Item
Grading Scale: (1) Unsatisfactory, (2) Improvement Required, (3) Company Standard, (4) Effective, (5) Precise

EVENTS		GRADING SCORE						COMMENT
A. DISCUSSION - PERFORMANCE		1	2	3	4	5	N/O	
1. Environment: Adverse Weather / Thunderstorm Avoidance								
2. Glide Slope Interception from Above								
3. Crew Incapacitation								
4. UPRT								
B. PREFLIGHT PREPARATION AND GROUND OPERATIONS		1	2	3	4	5	N/O	
5. Preflight Preparation / Briefing / TEM / NAVAIDS Setting								
6. Engine Start / Abnormal Engine Start / After Start								
7. Taxi Technique / Assistance / ATC Compliance / Before Takeoff Check								
C. TAKEOFF		1	2	3	4	5	N/O	
8. Takeoff Technique / Rotation Rate / Takeoff Attitude								
9. Gusty Wind / Cross Wind Takeoff								
10. Rejected Takeoff at a reasonable speed before reaching V1								
11. Takeoff with Simulated Engine Failure / Fire at V2								
D. INFIGHT MANEUVERS AND PROCEDURES		1	2	3	4	5	N/O	
12. SID - Standard Instrument Departure / RNAV SID								
13. STAR Standard Terminal Arrival Route / RNAV STAR / Holding Procedures								
14. Approaches to Stalls Recovery ☐ Clean / ☐ Landing Configuration								
15. 3D Approach to DH/A of 200 Feet or Higher								
16. 2D Approach (☐ RNP-RNAV / ☐ VOR / ☐ LOC) down to the MDH/A								
17. Manual Fly with / without Flight Director								
18. Manual Fly with One Engine Inoperative								
19. Approach Maneuvering (☐ Visual Circuit / ☐ Circling Approach)								
20. PBN Operations: Normal and Non-normal Procedure								
21. IR: Instrument Departure / Arrival / Approach								
22. Use the Appropriate Level of Automation								
23. Weather Avoidance								
24. Approach Preparation / Briefing / TEM / NAVAIDS Setting								
25. Descent and Approach Management / Aircraft Configuration								
26. Stabilized Approach Criteria and Compliance								
E. AIRCRAFT SYSTEM MALFUNCTION		1	2	3	4	5	N/O	
27. ATA28: Fuel (☐ Pump Low Press / ☐ Fuel Leak / ☐ FQI Fail / Degradation)								
28. ATA29: Hydraulic (☐ Pump Low Press / ☐ Overheat / ☐ Fluid Leak)								
29. ATA52: Door (☐ Cargo Door / ☐ Cabin Door / ☐ Others)								
F. ABNORMAL AND EMERGENCY PROCEDURE		1	2	3	4	5	N/O	
30. Engine Fire Handling and Decision Making								
31. Engine Failures / Shutdown / Restart								
32. Windshear at Takeoff / Landing								
33. Pilot Incapacitation								
34. TCAS TA Response (*)								
35. TCAS RAs - do not require a change in vertical speed (*)								
36. Declaration of Emergency or Urgency								

EVENTS	GRADING SCORE						COMMENT
G. MISSED APPROACH PROCEDURES	1	2	3	4	5	N/O	
37. Go Around / Missed Approach Procedure with all engines							
38. Go Around / Missed Approach Procedure with one engine failure							
39. Rejected Landing below DH / MDH / After Touchdown							
H. LANDINGS AND AFTER LANDING PROCEDURES	1	2	3	4	5	N/O	
40. Normal Landing / Landing Technique / Landing Attitude							
41. Landing in Out-Of-Trim Position							
42. Crosswind landings / Gusty Wind							
43. Reduced Flaps Landing (Flap3 or less)							
44. Landing with Simulated Engine Failure (Critical Engine)							
45. Landing Roll / After Landing / Parking / Securing Procedures							
46. Pax Evacuation Procedures (*)							
I. RIGHT HAND SEAT PROFICIENCY (For RHS Captain Only)	1	2	3	4	5	N/O	
47. Engine Failure before V1 RTO							
48. Engine Failure at Takeoff after V1							
49. One Engine ILS Approach Go-Around and Landing							
J. NON-TECHNICAL	1	2	3	4	5	N/O	
50. Crew Resource Management (CRM) / Assertiveness / Support Process							
51. Threat & Error Management / Security & Safety Attitude							
52. Public Address (PA)							
K. UPRT	1	2	3	4	5	N/O	
53. Part I: Demonstration							
54. Nose High Iteration 1 - use of elevator							
55. Nose High Iteration 3 - use of thrust reduction							
56. Nose Low Iteration 2 - accelerated stall (Landing Configuration)							
57. UPRT Nose High low energy							

Number of Manual Landing		Number of Go-around	
---------------------------------	--	----------------------------	--

COMPETENCY ASSESSMENT AND COMMENTS									
General Comments:		Competency	1	2	3	4	5	N/O	Instructor Declaration
		KNO							I am authorized by TVJ and/or CAAT to conduct such training as indicated, have supervised the required session in accordance with the published syllabus and assessed the performance of the flight crew. (✔ where applicable) to be filled and signed by the instructor
